

Asbestos can be anywhere in homes built before 1990

1

Think ahead

Is your home built before 1990?
You can't tell if materials contain
asbestos just by looking at them.

2

Plan ahead

You shouldn't remove asbestos
yourself. Planning ahead will
avoid delays and cost blow outs.

3

Get a professional

A licensed asbestos professional
will provide advice and help you
to proceed safely.

Be asbestos ready

Proudly working together
to manage asbestos
